Enrichr GO BP terms: scG4 G4 peak differential categories
Ubiquitin−Dependent Protein Catabolic Process
Proteasome−Mediated Ubiquitin−Dependent Protein Catabolic Process
Protein Modification Process
DNA Metabolic Process
DNA Damage Response
Proteasomal Protein Catabolic Process
DNA Repair
Organelle Organization
Phosphorylation
Regulation Of Translation
Modulation Of Excitatory Postsynaptic Potential
Synapse Assembly
Axonogenesis
Inorganic Cation Transmembrane Transport
Neuron Projection Development
Potassium Ion Transport
Regulation Of Voltage−Gated Sodium Channel Activity
Modulation Of Chemical Synaptic Transmission
Cilium Movement
Monoatomic Cation Transmembrane Transport
Negative Regulation Of Transport
Regulation Of Non−Canonical Wnt Signaling Pathway
Cell−Matrix Adhesion
Negative Regulation Of Endocytosis
Regulation Of Protein Kinase A Signaling
Regulation Of Focal Adhesion Disassembly
Positive Regulation Of Focal Adhesion Disassembly
Positive Regulation Of Sterol Transport
Negative Regulation Of Protein Dephosphorylation
Regulation Of Actin Cytoskeleton Organization
unchanged
